- Strong foundational knowledge of computer systems with the ability to quickly learn and adapt to new applications.

WORK EXPERIENCE

Junior Financial Analyst May 2026 -Present
Department of National Defence, Ottawa, Ontario

- Assist with data reconciliation, financial tracking, and report preparation for a team monitoring contractors, advance payments, and inventory.
- Support preparation of monthly, quarterly, semi-annual, and annual financial reports and contribute to Office of the Auditor General audit support.
- Verify information across databases and maintain accurate financial records using SAP, Excel, Access, and Power BI.

Junior Web Analytics Officer

September 2025 - April 2026

Employment and Social Development Canada, Gatineau, Quebec

- Support and lead Analytics Services projects, including developing a CRM model and reporting on Adobe Analytics insights to inform business decisions.
- Serve as acting coordinator for client onboarding, managing the full lifecycle of the Adobe Analytics (AA) solution—from initiation and testing to launch—while ensuring a smooth client experience.
- Utilize Power Platform, Excel, and AA tools, and apply working knowledge of HTML and JavaScript to interpret metadata and tracking snippets.

Junior Software Tester

January 2025 - August 2025

Department of National Defence, Ottawa, Ontario

- Ensured the quality and functionality of SAP systems by executing test scripts, analyzing results, and identifying and resolving issues to meet business process requirements.
- Continuously used SAP technologies, MS Excel, and MS Word to ensure quality within DRMIS (DND's ERP system).
- Provided comprehensive support to the Testing Management Team by testing, updating, cleaning scripts, and uploading them back into the script repository during release cycles.

Project Manager Intern

May 2024 - August 2024

Kyndryl, Ottawa, Ontario

- Received tasks from project managers across various client account teams to support their ongoing projects.
- Created dashboards on Power BI for multiple internal client account teams, performed analyses using Excel, and created and managed over 80 educational and repository pages on the internal company SharePoint site.
- Primarily focused on the new Client Account Vault, creating and managing internal repositories for delivery partners, project and program managers, and finance teams to centralize information.

WORK PROJECTS

Internal CRM App

October 2025 - April 2026

- Built and maintained an internal CRM application with SharePoint Lists, PowerApps, and Excel, integrating automated workflows and reporting dashboards to enhance team efficiency and accountability.

SAP Script Testing Upon Major Release

January - August 2025

- Performed testing in SAP PM, MM, and IM modules, executing 100+ test scripts and maintaining regression test cases to ensure system accuracy and reliability.

KPI PowerBI Dashboard

June - August 2024

- Built a Power BI dashboard using Project Hub data, creating DAX-based KPIs now used daily by project control managers.
